

International Journal of Modeling and Optimization

CONTENTS

Volume 3, Number 4, August 2013

Evaluation of P-Scheme/G Algorithm for Solving Recurrence Equations	311
<i>Akiyoshi Wakatani</i>	
Analysis on the Fault Trip of 27du/dt Protection and Countermeasure in Gaozhao HVDC.....	316
<i>Huang Yi-Long and Zhou Quan</i>	
Application of Analog-Circuit Diagnosis Method to Fault Location in Distribution Networks.....	320
<i>Minfang Peng, Meie Shen, Jianbiao He, Liang Zhu, and Hongwei Che</i>	
A New Simulation Architecture for Communication Network Systems with Application to HF Radio.....	324
<i>Duncan M. G. Tait, Andrew F. R. Gillespie, and Dave Cliff</i>	
Low Power Bit-Parallel Cellular Multiplier Implementation in Secure Dual-Rail Adiabatic Logic.....	329
<i>Cancio Monteiro, Yasuhiro Takahashi, and Toshikazu Sekine</i>	
Multi-Resolution Triangular Approximation of Terrains.....	333
<i>Yong H. Chung, Dae S. Chang, Ka R. Yang, Ji W. Oh, Kang H. Cho, and Sang C. Park</i>	
Finite Difference-Based Suboptimal Trajectory Planning of Biped Robot with Continuous Dynamic Response	337
<i>Hayder F. N. Al-Shuka, Burkhard J. Corves, Bram Vanderborght, and Wen-Hong Zhu</i>	
Large-Time Dynamics of Incompressible Fluid on a Sphere.....	344
<i>Yuri N. Skiba</i>	
New Exact Solutions of the Time-Fractional Nonlinear Dispersive KdV Equation.....	349
<i>Yusuf Pandir, Yusuf Gurefe, and Emine Misirli</i>	
Modified Trial Equation Method to the Nonlinear Fractional Sharma–Tasso–Oleiver Equation.....	353
<i>Hasan Bulut and Yusuf Pandir</i>	
A Comparative Study between Mixed and Displacement Model and the Effect of the Numerical Integration in the Axisymmetric Shell Finite Element Analysis.....	358
<i>H. Djamal, L. Bachir, and Z. Abdallah</i>	
Iterates Properties for q-Bernstein-Stancu Operators.....	362
<i>Yali Wang and Yinying Zhou</i>	
Nonlinear Super Integrable Couplings of Super C-KdV Hierarchy.....	369
<i>Si-Xing Tao</i>	
The Use of Finite Differences on Electric Currents Gives Credit to Coulomb’s Law as Causing Electromagnetic Forces, thereby Explaining Electromagnetic Induction.....	373

Jan Olof Jonson

Simulation for Analog Circuit Fault Propagation with Complex Networks.....377

Meie Shen, Minfang Peng, Jianbiao He, and Kai Xie
