#### • Applied Mathematics and Biomedical Engineering

- An Enhanced Wavelet Neural Network Model with Metaheuristic Harmony Search Algorithm for Epileptic Seizure Prediction.....90  
*Zarita Zainuddin, Kee Huong Lai, and Pauline Ong*
- Pharmacophore Modeling of  $N^1$ -alkyltheobromine as Histamine-H1 Receptor Antagonist.....98  
*Maywan Hariono and Habibah A. Wahab*
- Effects of Hand Washing Campaign on Dynamical Model of Hand Foot Mouth Disease.....104  
*Thanyada Phutthichayanon and Surapol Naowarat*
- Data Modeling Method Based on CAD Intersection and Its Application.....109  
*Xu Zhang, Min Huang, Jiajie Pan, and Jian Zheng*
- The Influence of Salt Solutions and Soil Interspace on the Fungal Counts of Stored Tomatoes in Cooling Structures.....114  
*Sunmonu Musliu Olushola*

#### • Control Technology and Mechanical Engineering

- Early Energy Estimation of Networked Embedded Systems Executing Concurrent Software Components.....119  
*Patrick Heinrich, Hannes Bergler, and Erik Oswald*
- Model Approximate Method of Complex System.....128  
*Juan Chen, Yuqin Liu, Shi'ang Qi, and Qing Guo*
- Effectiveness of Conventional CUSUM Control Chart for Correlated Observations.....135  
*D. R. Prajapati*
- Development of High-Speed Shearing Method to Obtain Flow Stress under High Strain Rate.....140  
*Norfariza Wahab, Hiroyuki Sasahara, Shinnosuke Baba, Yuta Hirastuka, and Takashi Nakamura*
- Research of Sensor Fault-Tolerant Control Based on CSA-SVR Algorithm for EMB Actuator System.....145  
*Yuxue Wang, Yinan Xu, Yihu Xu, and Yonghu Ma*

#### • Knowledge Engineering and Applications

- Enhanced Genetic Algorithm with K-Means for the Clustering Problem.....150  
*N. Bouhmala, A. Viken, and J. B. Lønnum*
- The Human Resources Assignment with Multiple Sites Problem.....155  
*Mohamed Afilal, Hicham Chehade, and Farouk Yalaoui*
- Estimate on the Risk of Epidemic Outbreaks for an Insurer: A Simple Stochastic Model.....161

*Chiaki Ishii, Naoyuki Ishimura, and Takahiko Fujita*
