

International Journal of Modeling and Optimization

CONTENTS

Volume 6, Number 3, June 2016

• Control Theory and System

Constrained-Optimal Based Loop-Shaping State Feedback Approach for Missile Autopilot Design.....128
Abd-Elatif M. A., Qian Longjun, and Bo Yuming

Trajectory Tracking of a Nonholonomic Wheeled Mobile Robot Using Hybrid Controller.....136
Zain Anwar Ali, Daobo Wang, Muhammad Safwan, Wanyue Jiang, and Muhammad Shafiq

Modeling and Automating of RCS's Lab Tracker.....142
Mohamed Galal and Jian-Yu Wang

Discrete Time Consensus of Leader Following BLDC Motor with Delay.....150
Suhaib Masroor, Chen Peng, Zain Anwar Ali, and Jin Zhang

• Electronics and Electrical Engineering

An Analytical Optimization Model for Holistic Multiobjective District Energy Management — A Case Study Approach.....156
Bejay Jayan, Haijiang Li, Yacine Rezgüi, Jean-Laurent Hippolyte, and Shaun Howell

Parallel Simulation Algorithm of VLSI for Multicore Workstations with Dynamic Faults Grouping.....166
D. E. Ivanov

• Electronic and Communication Engineering

Robust Transceiver Design for MIMO System with Amplify-and-Forward Relay.....171
Jun-Xu Su, Xiao-Min Chen, Qiu-Ming Zhu, Yi-Min Zhu, Zhu Fang

• Advanced Manufacturing and Mechanical Engineering

A Decision Support System for Optimization of Operator Schedule in Semiconductor Manufacturing Industries.....177
I-Hui Li, Kuan-Ju Lai, and I-En Liao

Flow Regime Identification in a Fluidized Bed Combustion Reactor.....188
Rajan K. Thapa, Christoph Pfeifer and Britt M. Halvorsen

Assembly Sequence Planning with Fireworks Algorithm.....195
Jun-Ying Li and Cong Lu
