

International Journal of Modeling and Optimization

CONTENTS

Volume 7, Number 1, February 2017

• System Modeling and Simulation

Mixing and Segregation in a Rotating Cylinder: CFD Simulation and Experimental Study.....1
Sumudu S. Karunaratne, Chameera K. Jayarathna, and Lars-Andre Tokheim

Sensitivity Analysis of Goal Programming Model for Dietary Menu of Diabetes Mellitus Patients.....7
Atmini Dhoruri, Dwi Lestari, and Eminugroho Ratnasari

Renewable Energy Based Tri-Generation Scheduling Model for an Industrial Center.....13
Secil Ercan and Gulgun Kayakutlu

The Small Sample Failure Distribution Model of Diesel Engine Component Parts Using the FMECA Approach
.....19
Guanfeng Wang, Yamei Zhou, Qiang Zhang, and Shaokun Wang

Simulation for Balancing Bike-Sharing Systems.....24
Yang-Kuei Lin and Francois Liang

• Materials and Mechanical Manufacturing Engineering

Robust Servomechanism LQR Comparison with Two- and Three-Loop Autopilot Designs.....28
Emad Mahrous Mohamed and Lin Yan

Embodiment Design Process in the Development of Articular Orthosis.....34
Ricardo Duarte, Antonio Ramos, and Michel Mesnard

Using FGM Family to Predict the Materials Demand of Downstream Manufactures.....39
H. H. Huang

Colloidal Particle Deposition in Porous Media Under Flow: A Numerical Approach.....43
Yajie Li, Otar Sarishvili, Aziz Omari, Azita Ahmadi, and Hongting Pu

• Geological Engineering and Structural Design

M5' Algorithm for Shear Strength Prediction of HSC Slender Beams without Web Reinforcement.....48
Ali Kaveh, Seyyed Mahmoud Hamze-Ziabari, and Taha Bakhshpoori

Estimation of Soil Moisture Profile Using Optimization Methods.....54
S. Farid F. Mojtahedi and Mohsen Sadoughi
