

International Journal of Modeling and Optimization

CONTENTS

Volume 7, Number 5, October 2017

• **Robot Design and Performance Optimization**

Assisted Methods for Optimization in Robotics.....256

Adrian D. Olaru, Mikulas E. Hajduk, Serban A. Olaru, Niculae C. Mihai, and Natalia M. Smidova

Real-Time Object Detection and Recognition System Using OpenCV via SURF Algorithm in Emgu CV for Robotic Handling in Libraries.....265

Corina Monica Pop, Gheorghe-Leonte Mogan, and Răzvan Gabriel Boboc

Industrial Robots Trajectories Planning for Flexible Manufacturing Systems.....270

Martin Bogdanovskyi and Josef Černohorský

• **Mechanical and Electronic Technology and Application**

Performances of Abrasive Water Jet Cutting with Hyper Pressure.....275

Miroslav R. Radovanović

From Mechatronics and Cyber — MixMechatronics to Claytronics.....280

Gheorghe Gheorghe

Automatic Sorting Machine Based on Vision Inspection.....286

Robert Ciobanu, Dana Rizescu, and Ciprian Rizescu

• **Biomedical Engineering and Computer Aided Diagnosis**

Computerized Assessment of the Functionality of the Human Upper Limb: New Approaches.....291

VioREL Gheorghe, Daniel Miu, Doina Bucur, Diamanta Mihaela Visan, and Nicolae Daniel Simion

A Finite Element Approach to Predict the Post-treatment Evolution of an Orthopedically Treated Vertebral Body Fracture.....296

Stelian Anghel, Tiberiu Bătagă, and Constantin Dogariu

• **System Modeling and Calculation**

Computing Minimum Spanning Tree in Interval Valued Bipolar Neutrosophic Environment.....300

Said Broumi, Assia Bakali, Mohamed Talea, Florentin Smarandache, and Rajkumar Verma

Preliminaries of Structural Parameters Approximation through Transcendence Equations for an ^{15}N Isotope Separation Column.....305

Muresan V., Sas D., Clitan I., and Unguresan M.-L.

Analytical Modeling of an ^{15}N Isotope Separation Column by Second-Order Quasi-Linear Equations with Two Independent Variables.....310

Sas D., Clitan I., Unguresan M.-L., Muresan, V.
